

March 27th 2017, sees JPJ Installations celebrate 20 years of trading. Set up at a home location by John Clarke, Paul Belton and John Belton. They initially set up as an installation company working out of a small unit / office. In 1999 JPJ installations then achieved Kawneer “approved dealer” status, that licenced them to fabricate and install all Kawneer products.

The company has grown steadily over this period and are now Kawneer’s largest UK authorised dealer thanks to the strength of its approach. The growth that we have enjoyed since our formation in 1997 is underlined by the fact that the company workforce has risen to 85 employees. This allows us to take on the increased number and the larger projects that have been coming our way.

Our turnover has increased annually, culminating in a turnover of 15 million last year.

Our success has been primarily built on a philosophy of hard work, honesty, flexibility and a desire to meet our client’s needs in an efficient manner. These ethics have been in place since the creation of the company by John, Paul and John.

JPJ Installations moved into our custom-built factory and office location on 16th Aug 2013. This enabled us to increase our outputs to match our project inputs. We currently offer façade packages up to around 4 million pounds.

As our team and facilities have improved, JPJ Installations has also underpinned it’s progression as a business by gaining various accreditations such as ISO 9001, ISO 14001 and OHSAS 18001, whilst it is also accredited to CHAS, Achilles, Constructionline and SMAS.

Having been careful to develop its infrastructure and its team to support its growth, JPJ can now look forward to 2017 with confidence as it looks to continue the momentum it has built up over the past 20 years.

JPJ would like to thank all its suppliers and customers for their support and custom and we look forward to working alongside you all for many more years.

John, Paul, John
